Founded in 1902, TYUT is one of the first three national universities in China, it is located in Taiyuan, the capital city of Shanxi Province, which is a famous historical city with a 2,500 years old history of urban construction and traditional Chinese culture. Taiyuan has a pleasant climate all year round, convenient transportation and low living costs, making it an ideal city for international students to study in China.

TYUT is a national "211 Project" and "double first-class" key construction university. Engineering Science, Materials Science and Chemistry consistently rank in the top 1% of ESI. Multiple disciplines are open to international students, including science, engineering, economics, law, education, literature, management, and fine arts. TYUT began to enroll international students in the early 1980s. More than 2,000 international students from almost 100 countries and regions have come to study here. Its cultivation capacity ranks first in Shanxi province.
